PROFILE

Computer engineer who thrives on putting together solutions and seeing them through to deliver results. I have delivered projects in IoT networking, machine learning, software testing & development and security engineering over three year,learning each new stack by building with it. I'd love to contribute to a team that benefits from what I bring. If that's yours, let's talk..

EXPERIENCE

Cybersecurity Intern 03/2026 – 06/2026
Norwegian University of Science and Technology (NTNU), Gjøvik, Norway

- Security-tested the PHIS/OpenSILEX REST API using the OWASP Web Security Testing Guide and built a dashboard to track vulnerabilities and remediation status.
